

Privacy Policy

Effective Date: August 10, 2026

Company: SSI Holdings LLC

Website: <https://MyDigitalData.org>

Overview

This Privacy Policy explains how information is handled when you visit MyDigitalData.org, purchase or download My Digital Data, contact Support, or use the purchased application.

1. My Digital Data Application Records

My Digital Data is designed so that the personal records, photos and documents you enter into the purchased application are stored locally on your device and in backup locations you choose. The application does not require those personal records to be uploaded to our cloud.

2. Information We May Receive Through the Website

- Contact information you voluntarily submit, such as name and email address.
- Purchase and transaction information supplied by or received from the payment processor, such as order status, transaction identifier, amount and limited billing details.
- Technical request information ordinarily generated when a browser connects to a website, such as IP address, browser type, timestamps and security logs.
- Support correspondence and information you choose to provide when requesting assistance.

3. Payment Processing

Payment card information is processed by the selected merchant processor. We should configure checkout so the company does not store complete payment card numbers or security codes on MyDigitalData.org.

4. Public Demo

The public interactive demo is populated with fictitious sample information and is intended for experimentation only. Visitors should not enter real sensitive personal information into the public demo. The demo resets automatically on a daily schedule.

5. Backups and Voluntary Sharing

The purchased application allows customers to create backups in locations they choose. If you copy an encrypted backup to a thumb drive, external drive, another computer, email service or other third-party service, that transfer is initiated and controlled by you. Third-party services are governed by their own terms and privacy practices.

6. Cookies and Similar Technologies

The website may use cookies or similar technologies that are necessary for site security, checkout, fraud prevention and basic operation. If non-essential analytics or advertising technologies are added, this policy and any required consent mechanism must be updated before deployment.

7. Service Providers

We may use service providers for website hosting, payment processing, email delivery, fraud prevention, customer support and secure software delivery. They receive information only as needed to provide those services and are subject to their own contractual and legal obligations.

8. Retention

Website, transaction and support records should be retained only as reasonably necessary for business, accounting, fraud prevention, legal and support purposes. A documented retention schedule should be adopted before launch.

9. Security

We use reasonable administrative, technical and organizational safeguards for information handled by the website and delivery systems. No method of transmission or storage can be guaranteed to be completely secure.

10. Your Choices and Legal Rights

Depending on where you live, applicable law may provide rights concerning personal information handled by the website. Requests should be directed to info@mydigitaldata.org. The final policy should be reviewed for the jurisdictions in which the product is offered.

11. Changes to This Policy

We may update this Privacy Policy. The current version and effective date will be posted on MyDigitalData.org.
